Profile

I am a Software Engineer with 3.6 years of experience in developing end-to-end Mobile and Web Enterprise-based applications using **React JS**, **AngularJS, Node JS**, **Express JS**, **Redux, MsSQL** and **Ionic Framework** and is capable of working with new technology through proven ability to understand and deliver what is needed on time

---

Professional Experience

- 3.6 years of experience in a corporate environment as a Full Stack Web developer.
- Analyzed business requirements, participated in technical design, development and testing of various modules assigned.
- Good Experience in developing the Single web pages.
- Developed and securing the application using form- based authentication using HTML, JavaScript, and CSS.
- Worked with Business Analysts to understand their business models and goals.
- Developed web pages using HTML/CSS and JavaScript.
- Implemented project using Agile SCRUM methodology. Involved in daily stand up meetings.
- Fixed bugs and provided support services for the application.
- Assisted in building reusable code and libraries for future use.
- Worked with business analysts to understand their business models and goals.

Aadvi Tech Solutions   June 2024 - Current

Project #1: MaxTrans Systems

- **Role:** Software Engineer - **Aadvi Tech Solutions**
- **Description**: This application is mainly focused on uploading, reviewing, and re-uploading large files (1 to 5 GB) of user prescriptions.
- **Responsibilities:**
  - Utilized S3 Bucket for file storage and Azure Portal for hosting, ensuring reliable and scalable file management.
  - Implemented a robust backend using MsSQL and Node.js, and a responsive frontend using React with Redux
  - Taking an active role in structuring our reusable components to make them easy to maintain and to ensure they are highly modularized.
  - Used High Charts to display yearly, monthly wise data
- **Environment:** HTML, CSS, Bootstrap, JavaScript, React, Redux, NodeJS, ExpressJS, MsSQL.

BOLLINA BHARGAVI
Software Engineer

Ruat Technologies   **May 2021-May 2024**

Project #2: Navigation for Coal Mining
- **Role:** Software Engineer **- Ruat Technologies**
- **Description**: This application is mainly focused on Routing & Tracking the mining truck Locations. Used Mapbox library for creating layers & routes. Used highcharts for creating charts related to the data of trucks in mining.
- **Responsibilities:**
  - Working knowledge of front-end optimization and performance techniques.
  - Makes design recommendations towards the development of new code or reuse of existing code
  - Taking an active role in structuring our reusable components to make them easy to maintain and to ensure they are highly modularized
- **Environment:** HTML, CSS, Bootstrap, JavaScript, React, NodeJS, ExpressJS, MongoDB.

Project #3: Event Calendar
- **Role:** Software Engineer **- Ruat Technologies**
- **Description:** This Application helps the MNCs to create a Calendar which is limited to the particular organization. We can create, edit, delete an event that is schedule to the team. When a person from a specific team is logged-in only events related to that team are visible. Converted text to image. Created a package which can be used by organization using which we can upload images or files or video or audio.
- **Responsibilities:**
  - Work with UI / UX designer to help create and then implement best design practices.
  - Extensive knowledge of CSS and JS methods for providing performance visual effects.
  - Work with mobile app developers to interface with native app features.
  - Work in Test Driven Development environment, leveraging QA automation test suite to provide unit tests and integration tests for all new functionality
- **Environment:** HTML, CSS, AngularJS, Node JS, GIT, Postgres.

Project #4: HRMS
- **Role:** Software Engineer **- Ruat Technologies**
- **Description:** This application helps any organization to manage employee details & assets etc. Admin can create tenants & employees and manage their data and give only specific access to them, which they can modify but new access cannot be added by them until and unless its approved by admin.
- **Responsibilities**:
  - Work with UI / UX designer to help create and then implement best design practices.
  - Cooperating with the back-end developer in the process of building the RESTful API.
  - Responsible for maintenance of applications with technologies such as HTML5/JavaScript/Bootstrap.
  - Collaborate with the QA team to define test cases, and metrics, and resolve questions about test results.
- **Environment:** HTML, CSS, ReactJS, Redux, NodeJS, MongoDB, Bitbucket.
